Charles Q. Rendora

Junior Web Developer | Junior Software Engineer

[City, Philippines] | [Phone number] | dora.charles.quinisio@gmail.com | github.com/Charlez121

PROFESSIONAL SUMMARY

Information Technology graduate (BSIT) with hands-on experience in Java programming, data structures, and web development through coursework and personal projects. Focused on building simple, reliable, and practical web applications, with a growing interest in backend development using Spring Boot and MySQL. Quick to learn new tools and comfortable working through problems step by step.

EDUCATION

STI College Novaliches

Bachelor of Science in Information Technology | [2025] - [2029]

TECHNICAL SKILLS

Programming and Web

- Java (object-oriented programming: constructors, encapsulation, inheritance, method overloading)
- HTML and CSS (responsive layouts, animations, Flexbox and Grid)
- Python (basic)

Backend and Databases

- MySQL
- Spring Boot (currently learning)

Tools

- Git and GitHub, Visual Studio Code, Figma

Data Structures

- Singly linked list, binary search tree, and heap-based priority queue implemented in Java

PROJECTS

Personal Portfolio Website (Independent Project)

- Designed and built a single-page portfolio with a fixed sidebar, smooth-scroll sections (Skills, About, Contact), and scroll-reveal animations using HTML, CSS, and JavaScript
- Added a mobile layout that turns the sidebar into a bottom navigation bar
- Includes a click-to-copy email card and a downloadable CV

URBN Thrift Shop Website Design (Independent Project)

- Designed in Figma and built a responsive e-commerce website for an urban-fashion thrift shop, including the Home, New Arrival, and About Us pages, using [HTML, CSS, and JavaScript]

Java Data Structures Projects (Academic)

- Built a playlist simulation using a singly linked list
- Implemented binary search tree operations (BSTNode, BST, and Main classes)
- Implemented a heap-based priority queue with Task and Main classes

WORK EXPERIENCE

[8Exile] - [Gamer/Costumer-Support] ([2022])

- Handled the day-to-day operations of an online platform, including monitoring the site, customer support, updating content, reporting issues.
